SOW FORD'S PREMIER SEEDS

Special Prices for Large Quantities.

NON-WARRANTY

As is customary in the sale of seeds, we give no warranty, expressed or implied, as to their growth, description, quality, or productiveness, and will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned, and any money paid to us will be refunded. Quotations are made and orders accepted on this distinct understanding.

If insufficient cash sent quantities reduced accordingly.

NON-WARRANTY.—We take the utmost care to supply Seeds, etc., true to name and character, of good germinating strength, and genuine in every way, but, owing to changeable climatic influences, different modes of cultivation, and various causes over which we have no control, **WE GIVE NO WARRANTY**, expressed or implied, as to description, quality, growth, productiveness or any other matter of any of the seeds, trees, plants and bulbs we send out, and will not in any way be responsible for results. If the purchaser does not accept the goods on these terms they are at once to be returned.

Quotations subject to Market Fluctuations and goods being unsold on receipt of orders.

NOTE.—Another Order Form will be found at the back of this book.

P.T.O.

[illegible]

TO OUR FRIENDS:

We take pleasure in presenting to you the 1931/2 edition of Ford's Red List—our Catalogue—and we wish to thank you at this time for your orders during the past year.

Such liberal patronage must be deserved, and we want to assure you that at all times we are most cautious to ensure the highest quality of Ford's Seeds. As in the past, your orders shall always have our most careful attention. Your requests for prompt delivery of any items required urgently shall be taken care of immediately.

We shall appreciate your valued orders, whether large or small, with the assurance that you will receive Quality Seeds and Quick Service.

Faithfully yours,
A. FORD & CO.

29/31 GOCH STREET,
NEWTOWN.
JOHANNESBURG.

Bankers:—**BARCLAYS.**

General Manager: **E. A. HOPSON, F.R.H.S.**

Suppliers of Seed to:—

The Union Agricultural Colleges.
The Government of the Union of South Africa.
The Rhodesian Governments.
The Portuguese East African Government.
The South West African Government.
The Kenya Colony Government.
The Swaziland Government.
The Basutoland Government.
The Indian Government.
The Argentine Republic.
The Johannesburg and other Municipalities, Land Corporations, etc.

Exporters of Seed to:—

Australia; United States of America; South America; France; India; Burma;
The Belgian Congo; Uganda; Portuguese East Africa; Nyasaland; Kenya;
Bechuanaland, etc., etc.

Our Goodwill—like Rome—was not built in a day.

We take pride in the Goodwill we have built up amongst discerning Farmers during the past 15 years, and it is our insistence upon giving customers the utmost in **SEED SERVICE** that has earned us our reputation.

Various methods are used to secure these results. Crops are arranged for, and are grown from Seed of our selection. Germination tests are made on arrival of the seed and at intervals afterwards.

The same precautions are taken with Imported Seeds in regard to germination and, of course, they are only bought from the World's most reliable Growers and Seedsmen.

In addition, we use the finest seed-cleaning machinery. The result is something better than you get in the ordinary way.

Ford's Seeds

Everyone who sells Seeds must realise how important it is for all kinds of gardeners to sow Seed of known quality. Our success in the Seed business has been possible because we have taken the greatest care at all times to provide all our customers with the best strains obtainable.

BUSINESS INFORMATION

QUOTATIONS ARE WITHOUT ENGAGEMENT, but where the price is mentioned on the order, we will refer back for confirmation if an increased rate has to be charged. If we fail to do this, the goods can be returned if the price is not approved.

When we are unable to supply the exact variety ordered, we use our best judgment as to substituting other varieties. Any such substitutions are always made with a due regard to season, locality and other conditions so far as known to us.

The substituted varieties are sent for your approval, and while we hope, and feel sure you will agree to what we have done with a desire to serve your best interest, you are at liberty to send back any such goods, and we will promptly credit you with their value.

WHEN TO ORDER: Kindly place your general order as early in the Season as possible, so that when conditions are favourable, your seed will be on hand.

METHOD OF ORDERING: Name, Postal Address, Station and District, should be clearly set forth, and full forwarding instructions given, so that mistakes cannot arise. PLEASE USE OUR ORDER FORMS, which will be found at front and back of this book. Further supplies on application.

TERMS: Prices quoted are FREE ON RAILS, JOHANNESBURG, NETT CASH, or per S.A. Railways, C.O.D., or Postal C.O.D. Cash should accompany all orders unless arrangements have been made for the opening of a monthly account, in which case our terms are strictly thirty days' cash, and all railrage must be paid by the purchaser. If GOODS ARE TO BE SENT TO SIDINGS, PLEASE INCLUDE COST OF RAILAGE, as same must be prepaid. Customers must clearly understand that we undertake no responsibility for the safe delivery of goods which are consigned by rail to SIDINGS where there is no Station Master.

Prices quoted herein are Union of South Africa Gold Currency payable in Johannesburg without any deduction.

NOTE. When insufficient Cash is sent, quantities will be reduced accordingly. Any excess payments will be returned with invoice.

Amounts up to 21/- kindly send by Postal Order.

PLEASE ADD 6d. EXCHANGE TO COUNTRY CHEQUES.

GOODS BY POST: Where it is desired that goods be forwarded by post a remittance must be sent to cover postage. Our Seeds are only bought from the World's most reliable Growers and Seedsmen, and, a large proportion being necessarily Imported, cannot be sent by Agricultural Post.

SEEDS BY PARCEL POST

Rates of Postage for IMPORTED Seed are as follows:—

SOUTH AFRICAN SEASONS.

Autumn commences	March 21
Winter commences	June 22
Spring Commences	September 24
Summer commences	December 22

HOW MUCH SEED YOU WILL REQUIRE

One pound of Broad Beans or Runners gives a row of 50 to 60 feet.

One pound of Kidney Beans gives almost double that length of row.

One ounce of Cabbage seed covers 6 to 8 square yards and the same applies to Cauliflower, Savoy, etc. From that amount you get 5,000 plants or more.

An ounce of Celery gives an enormous number of plants, say 20,000 or more.

An ounce of Leeks covers 5 square yards and yields up to 8,000 plants.

An ounce of Mustard covers 1 square yard; of Cress, 3 square yards; of Radishes, 2 to 3 square yards.

An ounce of Lettuce covers 10 to 15 square yards.

An ounce of Beetroot gives a row 50 feet long; Carrots 80 feet; Onion 150 feet; Parsnips 200 feet; Parsley 120 feet; Radishes 75 feet; Spinach 100 feet; and Turnips 120 feet.

WHEN TO ORDER SEEDS.

FLOWERS

JULY AND AUGUST:
 Order Annuals, for Summer flowers.
SEPTEMBER TO NOVEMBER:
 Order ALL Perennials.
DECEMBER AND JANUARY:
 Order Annuals, for Autumn flowers.
FEBRUARY AND MARCH:
 Order Annuals, for Winter flowers.
APRIL:
 Order Annuals, for Spring Flowers.

VEGETABLES

JULY TO OCTOBER:
 Order Summer Vegetables (see tables pages 52—59).
JANUARY AND FEBRUARY:
 Order Winter vegetables.

When an odd pound is ordered GROSS WEIGHT (Packing included) will be sent in order to save postage.

PEAS---ERTJIES

HIDDEN HELPERS

When you are clearing away Peas and Beans, do not pull up the plants, but cut them off at the soil and leave the roots in the ground.

The roots of Peas and Beans are covered with little nodules, in which live millions of tiny bacteria all engaged in changing atmospheric nitrogen into plant foods.

Leave them there to carry on the good work. Your next crops will reap the benefit.

5 lbs. or more will be supplied at the 10 lb. rate:

25 lbs. or more will be supplied at the 100 lbs. rate:

On larger quantities, write for special prices.

Seed Sowing

In 99 per cent. of the causes of failures experienced in raising Seed for the Home Garden, there is nothing at all wrong with the germinating power of the Seed, and the non-appearance of the plants is nearly always due to one of the following causes :—

1. Sowing Seed too deeply or not covering sufficiently.
2. Allowing the surface soil to become too dry-caked.
3. Omitting to provide some sort of covering during hot weather.
4. Sowing when the soil is too cold or too wet to permit germination.

Have You a Piece of Ground?

Whether in town or country there is always a small portion of ground available which serves no useful purpose. Make it useful by planting vegetables. The saving is enormous, the labour negligible, the results gratifying. Given the right type of seeds—that is *FORDS SEEDS*—you will be pleasantly surprised at the crop. With a little attention, you will be able to grow enough vegetables to serve your household needs with the minimum of cost.

Mr. W. Adenorff, (Jnr.), “Glenbarton,” Box 20, Charlestown, writes:—

For many years I have purchased all my Seed requirements from your firm, and I doubt whether there is any firm in the Union supplying better seed, as I invariably reap bumper crops, nomatter what the crop is, as long as the Seed is from “FORDS.”

LETTUCE---SLAAI

How to Grow Good Lettuce

Make sowings of seed about once every two or three weeks—just a pinch of seed on the rule of “little and often.” In the height of summer, or with dry weather, the seedlings do not transplant very easily, and moving causes them a bad

- - - It Pays to Grow New, Clean, Reliable Seed - - -

shock. Therefore, sow the seed very thinly indeed. When large enough to handle, thin out the seedlings to stand some 9 inches apart, and just leave them. This is the way to get lettuces of fine quality quickly.

In the case of tall or "cos" lettuce particularly, you need to remember that they are very thirsty subjects, and require a great deal of water if they are to grow quickly. You must remember though, that when you use the watering can very freely, the surface of the ground becomes very hard, so that every now and then it will pay to loosen it up with the hoe. To grow a really good, hearty lettuce of the cos variety, wait till it is about half developed, and then, fairly loosely, tie round a piece of bast, about two-thirds of the way up.

IMPORTED SEED. Available November, December, January, February.Scotch Up-to-dates cases 66 lbs. **21/-**Scotch Up-to-dates cases 100 lbs. **30/-****Prices:****COLONIAL SEED****Boxes, 75 lbs. 14/-****Bags, 150 lbs. 21/-****POTATO CULTURE**

Potatoes may be grown on many kinds of soil, but sandy loams produce the best crops. The soil for Potatoes should have been well dug some time previous to planting the seed and a dressing of well-rotted stable or kraal manure worked into the soil.

Where manure is unobtainable, a dressing of POTATO FERTILIZER should be applied at the rate of from 300 to 500 lbs. per acre.

The addition of 200 lbs. of POTATO FERTILIZER to land already dressed with manure has been found to give the best results.

Seed should be obtained some time previous to planting and laid out in a warm place to sprout. It is best to put in shallow boxes, with the eyes uppermost, and just covered with a layer of stable manure. By this method the first sprouts, which are the strongest are not broken, and an earlier and better return may be expected.

Planting should commence early in the Spring, as soon as soil has been worked into a good tilth. The depth of planting varies with the nature of the soil, but a depth of 4 to 5 inches is usual. Rows should be 26 inches apart, and tubers 12 to 15 inches apart.

When planting, a sprinkling of 4 oz. to the yard of POTATO FERTILIZER in the drills will help promote strong growth. Six bags will plant an acre, 25 lbs. will plant a row 250 feet long. Earthing up of Potatoes is not so much practised in some parts, but where it is done, it should be completed in two or three operations; as the haulm of the plant grows, a little soil being drawn up to the plant each time.

SPRAYING.—The spraying of Potatoes is now generally recognised as a preventative of disease, and it has been proved that Potatoes sprayed with Bordeaux Mixture give heavier crops. Spraying should be done during dry weather. First spraying when plants are well established, and another application three weeks later.

Some Reasons for Growing Cattle Pumpkins

1. A cheap, easily-grown, Winter fodder for Cattle, Pigs and Horses.
2. Of good feeding value and high palatability.
3. A short Season Summer crop, only occupying the land for four to five months.
4. Excellent as a Rotation crop for cleaning up weedy ground.
5. The pumpkins can be stored and used as required during the Winter and Early Spring.
6. A change of Fodder and a good addition to Chaff, Hay or Ensilage.

JOHANNESBURG

Messrs. Acutt & Fuller's Seed is very well known throughout the Union, Rhodesia, Portuguese East Africa, and South West Africa. It is gathered only from specially selected cobs. The demand for this seed increases yearly, in spite of having to compete with sellers of hybrid varieties with larger grain.

Many testimonials from satisfied clients.

The advantages of this variety are:—

- (1) QUICK MATURING. (Can be planted up to 15th December on the High Veld.)
- (2) HEAVY YIELDING.
- (3) A SMALL BUT HEAVY GRAIN, full machine bag of which weighs 240 lbs.
- (4) STOCK EAT ALL THE STALKS.
- (5) DROUGHT RESISTING.

25/- per bag 203 lbs. F.O.R. Johannesburg

Maize in South Africa

There has recently appeared a hand-book of some 300 pages entitled "Maize in South Africa," by A. R. Saunders, Senior Research Officer (Summer Cereals) in the Division of Plant Industry. The main object of this book is to put before agriculturists a concise summary of information on problems of Maize production in South Africa, and to present in a co-ordinated way the results of experiments on Maize carried out by the Department of Agriculture during recent years.

Farmers are recommended to buy the above mentioned book, which is published by the Central News Agency, Ltd., Box 1033, Johannesburg, at 20/- per copy, and is obtainable at all their Branches in South Africa.

We are indebted to Mr. A. R. Saunders for allowing us to put in this catalogue the following useful tables, extracted from his book:—

TABLE 23: NUMBER OF KERNEL ROWS PER EAR IN DIFFERENT VARIETIES OF MAIZE GROWN AT THE EXPERIMENT STATION POTCHEFSTROOM, DURING THE SEASONS 1926—27 AND 1927—8.

Brazilian Flour Corn	48.6	27.4	34.0	—	—	—	—	—	—	—

A very fundamental truth concerning the botanical composition of a population of maize plants is brought to light by these figures, viz. that a certain measure of variability in nearly all characters is a normal characteristic of a group of maize plants or ears. Therefore to designate any variety as being 10-rowed or 12-rowed is stating only part of the truth. In "Potchefstroom Pearl" for example, the row number "12" is merely the one which occurs with greatest frequency and is spoken of as the mode or modal number. According to the standards laid down for show purposes, therefore, the row numbers stipulated are merely the modes and are not exact indications of varietal type in this respect. Considering row number by itself a white dent ear with ten rows may belong to any one of eight of the varieties listed above. Accordingly it is often impossible to identify an individual ear of maize with any degree of certainty. If, on the other hand, a random sample of 100 or more ears is examined it is a comparatively easy matter to name the variety.

SEED MAIZE

Best Varieties for Different Areas

In making recommendations as to which sorts should be grown in specific localities the primary consideration, aside from market requirements, is the length of the effective growing season, for in any one locality varieties of approximately the same period of maturity will in time reach more or less the same level of productivity. Soil is of less importance than rainfall provided the growing season is adequately long and growth is not impeded or prevented by injurious salts. However, it is only to be expected that on lean soils the small growing, early maturing types—especially the flints—do proportionately better than the large, late maturing kinds. Conversely high soil fertility can best be utilized by means of late maturing, heavy yielding varieties so long as other requirements are met.

In regards to the time of maturity, the leading varieties may be grouped as follows:—

Late Maturing	Medium Late Maturing	Medium Early Maturing	Early Maturing
150—170 days Natal	130—150 days	110—130 days	90—110 days
White Horsetooth	Potchefstroom Pearl	Wisconsin White	Peruvian
Natal Yellow	Hickory King	Dent	Minnesota 13
Horsetooth	Sahara	American White	North Dakota
Salisbury White	Golden Beauty	Flint	
Ladysmith White		Natal 8 Row	
		"Boesman"	

The varieties of the first group are best suited to Low-veld areas with a fairly high rainfall. In favourable seasons they may also give good returns on the middle-veld (3,000—4,500 feet elevation). For example, over a nine-year period at the Potchefstroom School of Agriculture "Natal White Horsetooth" has outyielded all other varieties. In low-veld or Middle-veld areas where the rainfall is lower "Potchefstroom Pearl" may prove more useful than later maturing sorts.

In the second group are found the standard varieties of the Middle-veld and High-veld. On the High-veld proper of the Transvaal, in Natal and the North-western section of the Orange Free State "Hickory King" is the most popular breed, but in parts of the Western Transvaal and on the Springbok Flats it has been forced to a secondary position by "Potchefstroom Pearl" on account of the greater hardiness of the latter. Where yellow dents are preferred, "Sahara" is not easily excelled, especially during dry years.

For the extreme eastern Transvaal High-veld and for the eastern Orange Free State the flints are most suitable. "Boesman" probably occupies a larger morninge in the latter area than all other varieties combined. "Wisconsin White Dent" and "Silver King" are also much favoured, but since these two sorts possess undesirable features from a commercial point of view, they cannot be recommended except for consumption on the farm. For late sowing "Peruvian" a recent introduction from South America, should prove very serviceable since it is about ten days earlier in maturity than "Boesman."

Imported Scotch up-to-dates	66 lb. cases	21/-

(This Seed is available from November to February.)

LEGUMES

They gather nitrogen from the atmosphere without cost to the farmer and are often aptly referred to as "soil renovators." You cannot afford to overlook them.

WRITE FOR PRICES or see our advertisements in the "Farmer's Weekly" during Planting Season.

Farmers are rapidly awakening to the importance of growing some Legume or other. It is hardly necessary to define a Legume, but to those who are ignorant of its true definition, it might be described as a soil and animal improving crop.

A Legume, due to its capability of developing nodules containing nitrogen on its roots, improves the soil by adding that most important plant food to it. Several cases can be quoted where the inclusion of a Legume in a cropping system has resulted in a higher yield of crops following.

One of the main faults of cattle feeding in South Africa is the general scarcity of protein rich feeds. Such a deficiency could be supplied by growing a Legume. There is little doubt that in most farm practices highest profits are possible by feeding mainly home-grown feeds.

BEANS—

White Wonder (Trailers) ...	

BACTERIA FOR SEED INOCULATION

Every farmer should use our Bacteria to treat all Legumes, lucerne, beans and peas. It is the cheapest and best fertilizer known. Gives better crops, increases their food value 10 to 50 per cent. and leaves some 50 to 100 lbs. of nitrogen in the soil. Used to grow humus it is the world's best fertilizer. 8/6 per bottle sufficient for 25 lbs. of lucerne, or 60 lbs. of Peas, Beans or Cowpeas.

MUNG BEAN

(Phaseolus Radiatus L.)

WHY YOU SHOULD PLANT THE MUNG BEAN

1. It is erect in growth and consequently can be easily mown with ordinary mower and made into hay, or ploughed under as green manure; three difficult operations in connection with the Cow Pea because of the latter's decumbent growth.
 2. It yields better than the Cow Pea.
 3. It is less susceptible to disease.
 4. The hay crop matures in 100 days.
 5. The Bean crop matures in 135 days.
 6. It is readily eaten by cattle.
 7. It is very nutritious and does well as a Hay crop on dry lands.
 8. It has a large yield.
 9. It is simple to cultivate. Drill in rows three feet apart and about 12 lbs. seed per acre.
 10. Being a legume, it increases the nitrogen content of the soil.
 11. It is pre-eminently a crop to be used in maize rotation.
 12. PLANTING—Lowveld, August to December.
Middleveld, October to mid. December.
Highveld, October to end November.

SUNN HEMP ————— **A New Green Manuring Crop**
(*Crotalaria juncea*)

It is a Leguminous fibre plant grown in certain parts as a green Manure Crop.
SUNN HEMP is a Splendid Legume for Green Manuring, easily turned under.
It is specially suited to the Warmer Districts.
It takes the place of Cowpeas.
It stands drought well.
It makes good ensilage.
It is ready to plough in 3 or 4 months after planting.

The Value of Grass

At one time farmers simply looked on grass as a cheap food that was provided for their benefit by Nature, and not a crop that needed manuring or care of any sort. To-day, thanks to science, such men are better informed, and know that as with arable land so with pasture, they cannot expect the best returns unless they put something there. Grass is, after all, practically the basis of all life, and it is to be looked upon as one of the most valuable foods for all kinds of live stock, not excepting the pig. Therefore, no efforts should be spared to get a good crop, one that will provide an early bite, and also last long into the autumn. Carefully-planned systems of manuring and grazing will help this object to its desired end, but haphazard use of the pastures will only rob them of nourishing verdure. It is not every farm, especially those on the hills, that is well equipped with grass land, and thus it is up to the farmer to do the best he can to aid Nature in the provision of this natural food.

LAWN GRASSES

Bradley Roots (Colonial)	Per bag	15/-
English Lawn Grass Seed	Per lb.	2/-
Kentucky Blue Grass (Poa Pratensis)	Per lb.	4/-
Kikuyu Roots	Per bag	10/-
Florida Roots	Per bag	15/-

Renovation of Lawns

Lawns which have been badly laid down at first, or neglected afterwards, may be improved by sowing 20 to 30 lbs. of Lawn Seed per acre. Before sowing, the surface of the soil must be well stirred with a strong iron rake, and afterwards top-dressed with fine soil, if possible. If the land is poor, a top-dressing of Bone Meal is desirable. After top-dressing, roll the lawn, sow the seeds, rake them over with a fine rake, and afterwards roll well both ways.

Manuring and Soil Cultivation

However important manure may be in the production of crops of a high standard, it is not the only factor that will ensure success. The best manurial scheme cannot produce the desired results unless the soil is properly cultivated.

Manure quickens the growth of weeds, therefore proper cultivation of the soil, in order to eradicate weeds, is not only of greater importance than the manure, but it also serves to establish a mulch or "soil blanket," which enables the soil to absorb and retain the maximum quantity of water after rains, and reduces to a minimum the excessive loss of moisture by evaporation.

PLEASE NOTE.—Special Prices for large quantities. Standard Mixture is suitable for Cane, Cotton, Vegetables, Flowers, Maize, Root Crops and Wheat.

Fertilizers are applied to the soil to increase its fertility and to put back the plant food taken from the soil by growing crops. Experiments only can decide what fertilizers should be applied, but the following are approximate quantities necessary:—

Fertilizers for	Grain and Maize	200-400 lbs. per Acre
"	Lucerne and Tobacco	600-700
"	Potatoes and Roots	500-700
"	Vegetables	600-800

The smaller quantities could be applied on fertile soils, or on farms where extensive crops are grown, and the larger quantities on less fertile soils or in the case of intensive farming.

SOWING AND SEEDING CALENDAR

FOR FARM SEEDS

The data given below must necessarily be regarded as approximate, especially in reference to times of planting, the periods specified merely indicating the latitude that can be taken subject to weather conditions or facilities for irrigation. Figures indicate rate of seeding in pounds per acre, except where otherwise stated (two and one-ninth acres equal one morgen); b stands for broadcast, d for drills.

Artichokes (Jerusalem).—Same as potatoes (d).

Barley (Summer).—All Provinces, November to December (80—100).

Barley (Winter, Irrigated).—Transvaal, O.F.S. and Natal, May to June (70—80); Cape Midlands, February to May (60—70); Western Province, May (40—50 b).

Beans (Dwarf).—All Provinces, August to February, according to last and first appearance of frost (10—50, according to variety), drills two feet apart.

Beans (Runner).—All Provinces, October to November for seed; to December if for ploughing in (20—30, d).

Buckwheat.—Cape Midlands, November to February; Transvaal, November to January; Natal, September to February; Western Province, September to January (30—50, b).

Chicory (Summer).—All Provinces, November to December (4—5, d).

Chicory (Winter).—All Provinces, February to April (3—4, d).

Cotton.—All Provinces, October to November (5—7, d).

Cow-Peas.—All Provinces, October to December, for seed; to January for ploughing in (30—50, b or d).

Grasses.—Kikuyu: All Provinces, during moist warm weather, cuttings set 3 ft. x 3 ft. apart. Paspalums: All Provinces, November to February (15—20, b). Sudan: All Provinces, October to January (20, b). Tef: All Provinces, October to February (6—10, b). January to February will be found the best months for sowing most grasses.

Kaffir-Corn.—All Provinces, September to middle of December (5—8, d).

Linseed.—All Provinces, October to March (20—30, b).

Lucerne under Irrigation.—Cape Midlands, September to October and January to April; other Provinces, February to April (15, d; 25, b).

Maize.—Late Varieties (Natal White Horsetooth, Natal Yellow Horsetooth, Ladysmith White, Salisbury White, Hickory King, Louisiana Hickory, Eureka, Potchefstroom Pearl, German Yellow): September to middle of December.

WHEN TO ORDER SEEDS

FLOWERS

JULY and AUGUST	Order Annuals, for Summer Flowers
SEPTEMBER to NOVEMBER ...	Order all Perennials
DECEMBER and JANUARY ..	Order Annuals for Autumn Flowers
FEBRUARY and MARCH	Order Annuals, for Winter Flowers
APRIL	Order Annuals, for Spring Flowers

The Raising of Flowers from Seed in South Africa presents considerable difficulty to those who have not studied the problem, but is quite easy when once the few underlying principles have been grasped.

Keep Seeds Moist.—It is imperative to remember that Seeds must never be allowed to become dry, once they have been planted.

Shading is Necessary.—It is impossible in practice to keep seeds moist if they are exposed to our fierce sun. Shading is, therefore, necessary. In any case seeds germinate better in the shade.

Light is Essential.—Once the seedlings come through the ground, it is absolutely essential they should get as much light as possible, as otherwise they will become weak and stalky and will never make strong, sturdy plants. The direct rays of the sun only should, therefore be excluded.

Provided the foregoing 3 Essentials are carefully attended to, success is assured.

HOW CAN YOU EXPECT BEAUTIFUL FLOWERS

**If you do not give them a Square
Meal.**

Use Nitrate of Soda.

Beautify your Home with Flowers Grown in Your Own Garden

BEAUTIFUL FLOWERING BULBS

CULTURE

- (1) Trench the ground well and reduce to a fine tilth.
- (2) Fresh manure should never be used for bulbs. Well decayed manure, or Bone Dust is excellent for fertilizing. Dig in to a depth of nine inches.
- (3) Depth of Planting (a) 3 inches for medium and large varieties.
(b) 2 inches for small varieties e.g. Ranunculus, Anemones, Freesias.
- (4) Bulbs can be supplied from January to end of May. Early orders are solicited to avoid disappointment. Should a variety be sold out, the nearest available will be substituted.

FORD'S VIRGINIA BUNCH SEED MONKEY NUTS

SHELLED READY FOR PLANTING
SAMPLES and QUOTATIONS on APPLICATION

**ALL GOODS ARE OFFERED SUBJECT TO BEING UNSOLD ON
RECEIPT OF ORDER**

We handle absolutely nothing that we do not believe to be the best obtainable. Our system enables us to quote the lowest prices at which selected seed can be sold.

ONLY CLEAN, NEW SEED IS HANDLED BY US.

The principal lines stocked by us are detailed under their respective headings in the preceding pages. We have made it our business to stock only those types which have by experience proved to be the most suitable for South Africa.

It is impossible to quote firm prices in all cases, owing to unsettled markets, but those mentioned in this catalogue are current quotations at time of going to press. We reserve the right to vary prices without notice, but can always send definite quotations by wire or letter on request.

WHEN BETTER SEEDS ARE SOLD FORD'S WILL SELL THEM.

Samples sent by return of post on application.

Special quotations for large quantities.

IN CONCLUSION

As the foregoing list shows, we specialize in High Grade Seeds, and solicit your continued patronage on the merit of our Seeds and the fairness of our prices.

Yours faithfully,

A. FORD & CO.

MONTHLY SOWING CALENDAR

for Vegetables and Flowers

Showing what Seeds can be sown in each month from January to December under normal circumstances in the "**Transvaal**," the "**Orange Free State**," and the uplands of the "**Cape Province**."—In the "**Coast Districts**," the "**Low Country**" and "**Rhodesia**," being a fortnight to a month in advance, sowings may be started earlier, respectively, and carried on longer. What is, however, of greater importance than a strict adherence to date, is the ability of the gardener to take advantage of climatic conditions as they occur, to sow or plant, as the case may be, all seasonable seeds immediately the favourable opportunity arrives.

PACKET SEEDS, VEGETABLE & FLOWER

4/6 dozen. 6d. Packet. Post Free.

WHOLESALE: 30/- per gross (12 dozen), F.O.R. Johannesburg.

JANUARY

FRENCH BEANS—Plant largely.
RUNNER BEANS—Plant largely.
BEET—Sow largely.
BROCCOLI or KALE—Sow a medium crop.
BROCCOLI—Sow largely.
BRUSSELS SPROUTS—Sow a few.
CABBAGE—Sow largely.
CARROTS—Sow a medium crop.
CAULIFLOWER—Sow largely.
CELERY—Finish sowing.

CUCUMBER—Make a final small sowing.
SWEET CORN—Finish planting.
HERBS—Sow in tins or seed-bed.
KOHL RABI—Sow largely.
LEeks—Sow a few under shade.
Lettuce—Sow a few where to remain.
MUSTARD and CRESS—Sow fortnightly.
ONION—Sow a few salad or green onions.
PARSLEY—Sow a few in tins.
PARSNIP—Continue sowing.

PEAS—Make a good sowing.
RADISH—Sow a few in a shady place.
RED AND SAVOY CABBAGE—Sow largely.
SALSIFY and SCORZONERA—Sow a few.
SPINACH—Sow New Zealand variety and Spinach Beet.
SQUASH and VEGETABLE MARROW—Make a final small sowing.
TURNIP—Sow largely.

Plant out from seed-beds—Cabbage, Cauliflower, Celery, Rhubarb, Tomatoes, etc. Plant Potatoes. Protect the seed-beds from the sun by using shade frames. Keep up a good supply of water. See to it that the ground does not become caked, and hoe often.

Flowers marked (*) do not easily transplant, or, being very hardy, should be sown where plants are intended to remain. Thin out at an early stage; do not allow overcrowding. All other seeds can be sown in tins or shaded beds, pricked out into other tins, and finally transplanted to the open ground during suitable weather.

"SEEDS THAT SUCCEED"

FLOWERS—This being generally a very hot month, it is advisable to sow seeds in a position sheltered from the sun and hot winds, or, better still, in tins or boxes placed under a canvas frame. On dull days the covering should be removed altogether. Most of the following will bloom during the winter and early spring months. Sow:—

*Alyssum	*Calendula	*Dianthus (Pinks)	*Hollyhock	*Mignonette	*Salpiglossis
*Anemone	*Calliopsis	*Dianthus (Pinks)	*Hunemannia	*Nasturtium	*Scabious
*Antirrhinum	*Candytuft	*Eschscholtzia	*Larkspur	*Nicotiana	*Stocks
(Snapdragon)	*Carnations	*Forget-me-not	*Linum	*Pansy	*Sunflower
*Aquilegia	*Clarkia	*Freesias	*Lupinus	*Petunias (in tins)	*Sweet Sultan
*Asters	*Cyanthus Dampieri	*Gaillardia	*Marguerites	*Petunia	*Sweet William
*Balsam	*Cobaea	*Gypsophila	(Shasta Daisy)	*Phlox	*Verbena
*Bellis Perennis	*Cornflower	*Heliotrope (in tins)	*Marigold	*Poppy	*Wallflower
(double Daisy)	*Cosmos			*Portulaca	*Zinnias

 For the Greenhouse make sowings of the following kinds:—Cineraria, Cyclamen, Primrose.

FEBRUARY

RUNNER BEANS—Finish planting.
FRENCH BEANS—Finish planting.
BORECOLE OR KALE—Sow largely.
BEEF—Sow largely.
BROCCOLI—Finish sowing.
BRUSSELS SPROUTS—Sow largely.
CABBAGE—Continue sowing.
CARROTS—Sow a full crop.
CAULIFLOWER—Finish sowing.

 Plant out from seed-beds—Cabbage, Cauliflower, Celery, Leeks, Tomatoes, etc. Plant Potatoes. Do not forget to protect the seed-beds by using canvas shades, and keep up a good supply of water. See to it that the ground does not become caked. and hoe frequently.

ENDIVE—Make a good sowing.
HERBS—Sow in tins or seed-bed.
KOHL RABI—Sow largely.
LEeks—Sow a few.
LETTUCE—Continue sowing where to remain.
MUSTARD AND CRESS—Sow forthrightly.
ONION—Sow largely for salad and for bulbing.

PARSLEY—Sow largely.
PARSNIP—Make a good sowing.
PEAS—Sow largely.
RADISH—Sow for a succession.
RED AND SAVOY CABBAGE—Sow a medium crop.
SALSFY and SCORZONERA—Sow a few.
SPINACH and SPINACH BEET—Sow a few.
TURNIPS—Sow largely.

FLORA—This is the first month of autumn, and although the weather during the day is usually hot, the nights are cooler, and any favourable conditions of temperature should be taken advantage of for making a full sowing of seeds of plants marked as seasonable. Make also good use of your canvas frames. Sow:—

*Adonis	*Calliopsis	*Eschscholtzia	*Larkspur	*Nicotiana	*Scabious
*Ageratum	*Candytuft	*Forget-me-not	*Linum	*Pansy	*Stocks
*Alyssum	*Carnations	*Gaillardia	*Lupinus	*Petunias (in tins)	*Sunflower
*Anemone	*Clarkia	*Golden Feather	*Marguerites	*Phlox	*Sweet Peas
*Antirrhinum	*Cobaea	*Gypsophila	(Shasta Daisy)	*Poppy	*Sweet Sultan
*Aquilegia	*Convolvulus	*Heliotrope (in tins)	*Marigold	*Portulaca	*Sweet William
*Bellis Perennis	*Cornflower	*Hollyhock	*Mignonette	*Ranunculus	*Verbena
(double Daisy)	*Dianthus (Pinks)		*Nasturtium	*Salpiglossis	*Viola (in tins)
*Calendula					*Wallflower

 For the Greenhouse make sowings of Cineraria and Primrose. If it rains advantage must be taken to transplant any seedlings ready from previous sowings. Keep the surface of the soil well mulched.

Make the soil as rich as possible. Do not sow too deep, 2 or 3 times the thickness of the seed is the general rule. Keep seed-beds shaded and moist. Thin out timely and liberally. Transplant in wet or cloudy weather, and shade for a few days until the plants are thoroughly established. Keep the soil loose and fine by frequent workings.

Flowers marked (*) do not easily transplant, or, being very hardy, should be sown where plants are intended to remain. Thin out at an early stage; do not allow overcrowding. All other seeds can be sown in tins or shaded beds, pricked out into other tins, and finally transplanted to the open ground during suitable weather.

When Better Seeds are Sold FORD'S will Sell Them

MARCH

BEEF—Make a good sowing.
BORECOLE OR KALE—Sow a medium crop.
BROAD BEANS—Sow a few.
BRUSSELS SPROUTS—Finish sowing.
CABBAGE—Finish sowing.
CARROTS—Sow for a succession crop.
ENDIVE—Sow largely.

Plant out from seed-beds—Broccoli, Borecole, Cabbage, Cauliflower, Celery, Leeks, Parsley, etc.

HERBS—Finish sowing.
KOHL RABI—Make a medium sowing.
LEeks—Sow largely.
LETTUCE—Continue sowing.
MUSTARD AND CRESS—Sow fortnightly.
ONION—Sow largely for salad and for bulbing.

PARSLEY—Make a good sowing.
PARSNIP—Sow for succession.
PEAS—Sow a medium crop.
RADISH—Sow for a succession.
RED AND SAVOY CABBAGE—Sow a few.
SPINACH—Sow largely.
TURNIP—Sow largely.

FLOWERS—The nights are now becoming colder, although the days may be warm, and all the seeds recommended should be sown as soon as possible, as they germinate much quicker when the soil is still warm, and give the seedlings a chance to make a bold display. Many of the seeds named can be sown out of doors, but any that are tender are better sown under the canvas shade, even now, as they are so much better under control. Sow:—

Adonis	Linaria	Nicotiana	Scabious
Ageratum	Lobelia (in tins)	Nigella	Schizanthus
*Alyssum	*Lupinus	Pansy	Stocks
Anemone	Marguerites	Pentstemon	Sweet Peas
Antirrhinum	(Shasta Daisy)	Petunia (in tins)	Sweet William
(Snapdragon)	Golden Feather	Phlox	Verbena
Aquilegia	*Gypsophila	*Poppy	Violets (in tins)
Bellis Perennis	Heliotrope (in tins)	*Mignonette	Virginian Stocks
(double Daisy)	Hollyhock	Musk	Wallflower
*Calendula	*Hunemannia	*Nasturtium	
Calliopsis	*Larkspur	Ranunculus	
		Salpiglossis	

Thin out and transplant.

APRIL

BORECOLE OR KALE—Finish sowing.
BROAD BEANS—Make a good sowing.
BEEF—Finish sowing.
ENDIVE—Finish sowing.
LEeks—Finish sowing.

Plant out Borecole, Cabbage, Celery, Leeks, Onions, Parsley, etc.

LETTUCE—Sow for a succession.
MUSTARD AND CRESS—Sow fortnightly.
ONION—Finish sowing a few.
PARSLEY—Finish sowing.

PARSNIP—Finish sowing.
RADISH—Sow for a succession.
SPINACH—Sow a medium crop.
TURNIP—Finish sowing.

FLOWERS—This is the last month of autumn, and, if not already done, sowing should not be further delayed, as the cold weather, which will soon be upon us, will retard their growth. The canvas frame is now not only useful for shading purposes but is also a protection against frosts; remove the cover entirely during the day when it is fine, replacing it at night. Sow:—

Adonis	Dimorphotheca	Heliotrope (in tins)	*Nasturtium	Salpiglossis
Ageratum	*Eschscholzia	Hollyhock	Nicotiana	Scabious
*Alyssum	Forget-me-not	*Larkspur	Pansy	Stocks
Anemone	Foxglove	*Hunemannia	Pentstemon	Sweet Peas
Antirrhinum	Freesias	*Lupinus	Petunia (in tins)	Sweet William
(Snapdragon)	Gaillardia	Marguerites	Phlox	Verbena
Aquilegia	Godetia	(Shasta Daisy)	*Poppy	Violets (in tins)
Bellis Perennis	Golden Feather	Marigold	Primula (in tins)	Virginian Stocks
(double Daisy)	*Gypsophila	*Mignonette	Ranunculus	Wallflower

Continue to plant out seedlings from previous sowings.

Flowers marked (*) do not easily transplant, or, being very hardy, should be sown where plants are intended to remain. Thin out at an early stage; do not allow overcrowding. All other seeds can be sown in tins or shaded beds, pricked out into other tins, and finally transplanted to the open ground during suitable weather.

MAY

BROAD BEANS—Make a good sowing. LETTUCE—Sow under protection.

MUSTARD AND CRESS—Sow fortnightly. RADISH—Sow a few in a sunny spot.

Divide and replant Herbs, Horse Radish, etc. Transplant Cabbage, Leeks, Onions, Parsley, etc. Dig, manure, and trench your garden. Destroy all refuse from past crops.

SPINACH—Sow a few.

FLOWERS.—Although we are entering the cold season, many of the hardier varieties may still be sown to keep up a succession of bloom. As early frost must be expected this month, it is advisable to sow in a glass or a canvas frame placed in a warm position. Very hardy and strong-growing plants can however be sown out of doors. Sow:—

*Alyssum	*Calendula	*Delphinium	*Gypsophila	*Nasturtium	Primula (in tins)
Antirrhinum	Callionopsis	Dianthus (Pinks)	*Larkspur	Nicotiana	Sweet Peas
(Snapdragon)	*Candytuft	Dimorphotheca	*Lupins	Pansy	Sweet William
Aquilegia	Cantebury Bells	*Eschscholtzia	Marguerites	Petunia (in tins)	Stocks
Bellis Perennis	Carnation	Forget-me-not	(Shasta Daisy)	Phlox	Verbena
(double Daisy)	*Cornflower	Foxglove	*Mignonette	*Poppy	Wallflower

JUNE

BROAD BEANS—Sow a medium crop. LETTUCE—Sow a few under protection.

MUSTARD AND CRESS—Continue sowing. RADISH—Sow a few in a sunny spot.

Make sowings under protection. Plant Herbs, Onions, Leeks, etc. Have a thorough clean up of your garden, and dig, manure, and trench same.

SPINACH—Sow a few in a warm situation.

FLOWERS.—As this is normally a very cold month and no warmth in the soil, only those possessing a glass house, a hot-bed, or a cold frame, should attempt to raise seeds except the very hardiest sorts. The garden should be thoroughly manured and dug over for the coming season. Sow, under protection:—

- | | | | | | |
|-----------------|-------------|----------------|------------|---------|------------|
| Antirrhinum | *Calendula | Delphinium | *Hollyhock | *Lupins | Sweet Peas |
| (Snapdragon) | *Candytuft | *Eschscholtzia | *Larkspur | Pansy | Verbena |
| Bellis Perennis | *Cornflower | | | | |
| (double Daisy) | | | | | |

Keep the seed-beds covered at night with straw matting or bags, or give some other protection.

Make the soil as rich as possible. Do not sow too deep, 2 or 3 times the thickness of the seed is the general rule. Keep seed-beds shaded and moist. Thin out timely and liberally. Transplant in wet or cloudy weather, and shade for a few days until the plants are thoroughly established. Keep the soil loose and fine by frequent workings.

Choice Collection of Flower Seeds. YOUR OWN SELECTION.	12 Packets for	4/6	Nett cash with Order, Post Free, to any part of the Union. Outside Union 6d., 1/- and 1/6 extra for postage respectively.
	25 Packets for	8/6	
	50 Packets for	16/-	

Flowers marked (*) do not easily transplant, or, being very hardy, should be sown where plants are intended to remain. Thin out at an early stage; do not allow overcrowding. All other seeds can be sown in tins or shaded beds, pricked out into other tins, and finally transplanted to the open ground during suitable weather.

JULY

BROAD BEANS—Sow a medium crop.
CABBAGE—Sow a few.
LEeks—Sow a few under protection.
LETTUCE—Sow a few under protection.

Protect your seed-beds by canvas shades. Plant out Leeks, etc.

MUSTARD AND CRESS—Sow fortnightly.
PARSLEY—Sow a few in tins.
PEAS—Sow largely.
RADISH—Sow a few in a sunny spot.

RHUBARB—Sow a few in a frame.
SPINACH—Sow a few in a warm situation.
TOMATOES—Sow a few in a frame.
TURNIP—Sow a few.

FLOWERS.—As the weather will not be favourable for sowing out of doors for another month, it will be advisable to do all preparatory work possible in the garden to receive new plants next month and later. The following may be sown if protection can be given:—

Antirrhinum (Snapdragon)
*Candytuft
Canna
Canterbury Bells
Golden Feather
Hollyhock
*Hunemannia
*Larkspur
Lobelia (in tins)
Marguerite (Shasta Daisy)
Marigold
Nicotiana
Pansy
Pectunia (in tins)
Sweet Peas
*Sweet Sultan
Sweet William
Violets (in tins)
Verbena

Keep the seed-beds covered at night with straw matting or bags, or give some other protection.

AUGUST

ARTICHOKE—Sow a few in a frame.
BROAD BEANS—Finish sowing a few.
BEET—Make a good sowing.
FRENCH BEANS—A few may be sown towards the end of the month in a warm locality.

CABBAGE—Sow a medium crop.
CAPSICUM—Sow a few in a frame.
CAPE GOOSEBERRY—Sow a few.

CARROT—Sow a medium crop.
CELERY—Make a small sowing in tins and protect carefully.

CHERVIL—Sow a few.

CHICORY—Sow a medium crop.
CUCUMBER—Make a small sowing in a frame for planting out early.

ENDIVE—Sow a few.
HERBS—Sow largely all kinds under protection.

KOHL RABI—Sow a few.
LEeks—Sow a medium crop.
LETTUCE—Sow largely, under protection.

MELONS—Sow a few along with Cucumbers in a frame.
MUSTARD AND CRESS—Sow fortnightly.

ONION—Sow largely.

Make good use of your shade frames for raising all kinds of Vegetables and Salads, which are inconvenient to transplant and cannot therefore be raised in tins or boxes. Plant Potatoes. Transplant Onions, Rhubarb, Leeks, etc.

FLOWERS.—This month ushers in the spring season, and the increasing warmth will greatly accelerate growth. If weather permits we advise a full sowing of all hardy annuals in open border, and more tender varieties in tins under protection. Sow:—

Adonis
Ageratum
*Alyssum
Antirrhinum
Aquilegia
Arctotis
Aster
Barbington Daisy
Bellis Perennis
*Calendula (double Daisy)
Calliopsis
Canary Vine
*Candytuft
Canna
Carnation
Chinese Lantern
Chrysanthemum
*Clarkia
Cobaea
*Convulvulus
*Cornflower
Cosmos
Cockscomb
Dahlia
Delphinium

Dianthus (Pinks)
Dimorphotheca
*Eschscholtzia
Foguet-me-not
Foxglove
Freesias
Gaillardia
Geum
Gladiolus
Godetia
Golden Feather
Granadilla
Gypsophila
*Heliotrope (in tins)
Hollyhock
*Hunemannia
Ice Plant
Kudzu Vine
Kochia
Larkspur
Linaria
*Lupinus (in tins)
*Marguerite
Marigold
*Mignonette
Mina Lobata
*Nasturtium
Nemesia
Nicotiana
*Nicotiana
Ornamental Grasses
Pansy
Penstemon
Pectunia (in tins)
Phlox
*Poppy
Portulaca
Pyrethrum
Salpiglossis
Salvia
Scabious
Schizanthus
*Statice
*Sunflower
Sweet Peas
*Sweet Sultan
Sweet William
Verbena
Violets (in tins)
Wistaria

For the Greenhouse make sowings of Primula, etc.

Protect your seed-beds against frost and high winds.

Flowers marked (*) do not easily transplant, or, being very hardy, should be sown where plants are intended to remain. Thin out at an early stage; do not allow overcrowding. All other seeds can be sown in tins or shaded beds, pricked out into other tins, and finally transplanted to the open ground during suitable weather.

SEPTEMBER

ARTICHOKE—Sow largely.
ASPARAGUS—Sow largely.
FRENCH BEANS—Sow a medium crop.
RUNNER BEANS—Sow a medium crop.
BEET—Make a good sowing.
CAPE GOOSEBERRY—Sow largely.
CAPSICUM—Sow largely in tins; protect.
CARROT—Sow a full crop.
CELERY—Sow largely in tins.
CHICORY—Sow a full crop.
SWEET CORN OR MEALIES—Sow a few late in the month.
CUCUMBER—Sow a medium crop and protect

EGG PLANT—Make small sowing in frame.
ENDIVE—Make a small sowing.
HERBS—Sow all kinds.
KOHLE RABI—Sow a medium crop.
LEKES—Sow a full crop.
LETTUCE—Sow largely.
MELONS—Sow medium crop and protect.
MUSTARD AND CRESS—Sow fortnightly.
OKRA—Sow a few.
ONION—Make a good sowing.
PARSLEY—Sow a full crop.
PARSNIP—Sow a medium crop.
PUMPKIN—Sow a few in a protected place.

PEAS—A few may still be chanced in a cool and shady place.
RADISH—Sow for a succession.
RHUBARB—Sow largely.
SALSFY AND SCORONERA—Sow largely.
SPINACH—Sow largely.
SQUASH AND VEGETABLE MARROW—Make a small sowing in a protected place.
SWISS CHARD OR SPINACH BEET—Sow largely.
TOMATO—Sow largely.
TURNIP—Sow a medium crop.

Water and hoe frequently. Transplant Celery, Rhubarb, Leeks, Parsley, etc.

FLOWERS—This is considered the best month to sow half-hardy annuals as frosts by this time are practically over. Thin out any seedlings which may have germinated too thickly. Mulch the surface of the soil with manure, which will greatly prolong the blooming season of annuals, as it will keep the soil cool and retain the moisture. Sow:—

- | | | | | | |
|-----------------|------------------|-----------------------|-------------------------|---------------------|-------------------|
| Adonis | Ganna | Dimorphotheca | *Humenannia | *Nasturtium | Scabious |
| Ageratum | Gernation | *Eschscholtzia | Ice Plant | Nemesia | Schizanthus |
| *Alyssum | Ginasee Lantern | Forget-me-not | Jap Kudzu Vine | Nicotiana | Statice |
| Anarrhithum | *Chrysanthemum | Foxglove | Kochia | *Nigella | *Sunflower |
| Antirrhinum | *Clarkia | Freesia | *Larkspur | *Ornamental Grasses | Sweet Sultan |
| Aquilegia | *Cianthus | Gaillardia | Linaria | Pansy | Sweet William |
| Arctotis | Cobaea | Geum | *Linum | Pentstemon | Verbena |
| Asters | *Convolvulus | Gladiolus | Lobelia (in tins) | Petunia (in tins) | Violets (in tins) |
| Balsam | *Cornflower | Godetia | *Lupinus | Phlox | Wistaria |
| Barberton Daisy | Cosmos | Golden Feather | Marguerite | *Poppy | Zinnia |
| Calendula | Cockscomb | *Gypsophila | Marigold (Shasta Daisy) | Portulaca | |
| Calliopis | Dahlia | *Grinadilla | Mina Lobata | Pyrethrum | |
| Canary Creeper | Delphinium | *Heliotrope (in tins) | *Mignonette | Salpiglossis | |
| *Candyuft | Dianthus (Pinks) | Hollyhock | | Salvia | |
- For the Greenhouse make sowings of Cyclamen, etc.

Make the soil as rich as possible. Do not sow too deep, 2 or 3 times the thickness of the seed is the general rule. Keep seed-beds shaded and moist. Thin out timely and liberally. Transplant in wet or cloudy weather, and shade for a few days until the plants are thoroughly established. Keep the soil loose and fine by frequent workings.

Choice Collection of Flower Seeds.

YOUR OWN SELECTION. 50 Packets for

12 Packets for 4/6 Nett cash with Order, Post Free, to any part of the Union. Outside Union 8/6

25 Packets for 6d., 1/- and 1/6 extra for postage respectively.

50 Packets for 16/-

Flowers marked (*) do not easily transplant, or, being very hardy, should be sown where plants are intended to remain. Thin out at an early stage; do not allow overcrowding. All other seeds can be sown in tins or shaded beds, pricked out into other tins, and transplanted to the open ground during suitable weather.

OCTOBER

ARTICHOKE—Sow a medium crop.
 ASPARAGUS—Sow a medium crop.
 FRENCH BEANS—Sow largely.
 RUNNER BEANS—Sow largely.
 BEET—Sow a full crop.
 CAPE GOOSEBERRY—Sow a full crop.
 CAPSICUM—Sow largely in tins.
 CARROT—Make a good sowing.
 CELERY—Continue sowing in tins.
 CHERVIL—Continue sowing.
 CHICORY—Make a good sowing.
 SWEET CORN OR MEALIES—Sow largely.

Give plenty of shade to the seed-beds.

Tomatoes, Parsley, Onions, etc.

FLOWERS.—The summer heat will soon be upon us, but if favoured with some good rains we can still sow most of the hardy annuals with good prospects of success. Sow all descriptions of flower seeds as recommended for SEPTEMBER.

For the Greenhouse make sowings of the following kinds:—Cyclamen, Cineraria, Primrose, etc.

seed-beds by using shade frames, etc., and water liberally in dry weather.

NOVEMBER

ARTICHOKE—Sow a few in tins.
 ASPARAGUS—Sow a few.
 FRENCH BEANS—Sow largely.
 RUNNER BEANS—Sow largely.
 BEET—Sow a medium crop.
 BROCCOLI—Sow a medium crop.
 CABBAGE—Sow a medium crop.
 CAPE GOOSEBERRY—Sow a few.
 CAPSICUM—Finish sowing.
 CARROT—Sow a medium crop.
 CAULIFLOWER—Sow a medium crop.
 CELERY—Sow a few in tins.

Give plenty of shade to the seed-beds.

from seed-beds—Capsicum, Egg Plant, Parsley, Tomatoes, etc.

FLOWERS.—Only a limited amount of sowing can be done this month, but all the following will do well provided they are kept well watered. If sown in the open ground, cover the soil with a little stable litter to keep it cool. Germination will be more certain if this is done. Sow:—

Adonis
 Ageratum
 *Alyssum
 *Anemone
 *Antirrhinum
 (Snapdragon)
 Aquilegia
 Asters
 Balsam
 Barbeton Daisy
 *Calendula
 *Calliopsis
 Carnation
 Chrysanthemum
 *Cianthus
 *Convolvulus
 *Cordflower
 *Cosmos
 Dahlia

Dianthus (Pinks)
 Dimorphotheca
 *Eschscholtzia
 Foxglove
 Gaillardia
 *Godetia
 *Gypsophila
 Heliotrope (in tins)
 Hollyhock
 Ice Plant

Kochia
 *Larkspur
 *Linum
 Lobelia (in tins)
 *Lupinus
 *Marguerite
 (Shasta Daisy)
 *Marigold
 *Mignonette
 *Mina Lobata

*Nasturtium
 Nemesis
 *Nigella
 *Pansy
 Penstemon
 Petunia (in tins)
 *Phlox
 *Poppy
 Portulaca
 Pyrethrum

Salpiglossis
 Salvia
 Scabiosa
 *Sunflower
 *Sweet Sultan
 Sweet William
 Verbena
 Violet (in tins)
 Zinnia

For the Greenhouse make sowings of Cineraria, Cyclamen, Primula, etc.

Give plenty of shade to the seed-beds by using shade frames, etc., and water liberally in dry weather.

Flowers marked (*) do not easily transplant, or, being very hardy, should be sown where plants are intended to remain. Thin out at an early stage; do not allow overcrowding. All other seeds can be sown in tins or shaded beds, pricked out into other tins, and finally transplanted to the open ground during suitable weather.

DECEMBER

ARTICHOKE—Finish sowing.
 ASPARAGUS—Finish sowing.
 FRENCH BEANS—Sow largely.
 RUNNER BEANS—Sow largely.
 BEET—Sow for a succession.
 BROCCOLI—Sow largely.
 CABBAGE—Sow largely.
 CARROT—Continue sowing a few.
 CAULIFLOWER—Sow a full crop.
 CELERY—Sow a few in tins.

SWEET CORN OR MEALIES—Continue sowing.
 CUCUMBER—Sow a medium crop.
 HERBS—Sow all kinds.
 KOHL RABI—Sow a few.
 LETTUCE—Sow a few where to remain.
 MUSTARD AND CRESS—Sow fortnightly.
 PARSLEY—Sow a few.
 PARSNIP—Sow largely.

PUMPKIN—Finish sowing.
 RADISH—Sow a few in a shady place.
 RED AND SAVOY CABBAGE—Sow a few.
 SPINACH—Sow New Zealand variety.
 SPINACH BEET or SWISS CHARD—Sow a medium crop.
 SQUASH and VEGETABLE MARROW—Sow a medium crop.
 TOMATO—Make a final sowing.

Give plenty of shade to the seed-beds. Water and hoe frequently, so that the ground does not become craked. Plant out from seed-beds—Cabbage, Cauliflower, Capsicum, Egg Plant, Tomatoes, Parsley, etc.

FLOWERS.—Generally a hot and dry month, during which scarcely anything in the way of sowing can be done unless there is rain. Water freely if necessary. If not previously done, give the ground a good mulching. This retards evaporation from the soil, besides stimulating the plants and keeping the roots cool. Sow:—

Adonis
 Ageratum
 *Alyssum
 *Amaranthus
 Antirrhinum
 (Snapdragon)
 Aquilegia
 Asters
 Balsam

Barberton Daisy
 *Calendula
 *Calliopsis
 Chrysanthemum
 *Clarkia
 *Climacus
 Cockscomb
 *Convolvulus
 *Cornflower

*Cosmos
 Dianthus (Pinks)
 *Eschscholtzia
 Foxglove
 Freesia
 Gaillardia
 *Godetia
 Golden Feather
 *Gypsophila

Hollyhock
 Ice Plant
 *Kochia
 *Larkspur (in tins)
 *Lobelia
 *Lupinus
 *Marigold
 *Mignonette

*Nasturtium
 *Nigella
 Pentstemon
 Petunia (in tins)
 *Poppy
 *Phlox
 *Portulaca
 Pyrethrum

Salpiglossis
 Scabiosa
 Stocks
 *Sunflower
 *Sweet Sultan
 Sweet William
 Verbena
 Zinnia

For the Greenhouse make sowings of Cineraria, Cyclamen, Primula, etc. Give plenty of shade to the seed-beds by using shade frames, and water liberally in dry weather.

Make the soil as rich as possible. Do not sow too deep, 2 or 3 times the thickness of the seed is the general rule. Keep seed-beds shaded and moist. Thin out timely and liberally. Transplant in wet or cloudy weather, and shade for a few days until the plants are thoroughly established. Keep the soil loose and fine by frequent workings.

PACKET SEEDS, VEGETABLE & FLOWER

4/6 dozen. 6d. Packet. Post Free.

WHOLESALE: 30/- per gross (12 dozen), F.O.R. Johannesburg.

Flowers marked (*) do not easily transplant, or, being very hardy, should be sown where plants are intended to remain. Thin out at an early stage; do not allow overcrowding.
